

1. Centre court

Turn on the Snap feature (View>Snap) and the Rulers (View>Rulers). Click and hold the cursor in the top ruler then drag the guide precisely down to the centre of the image.

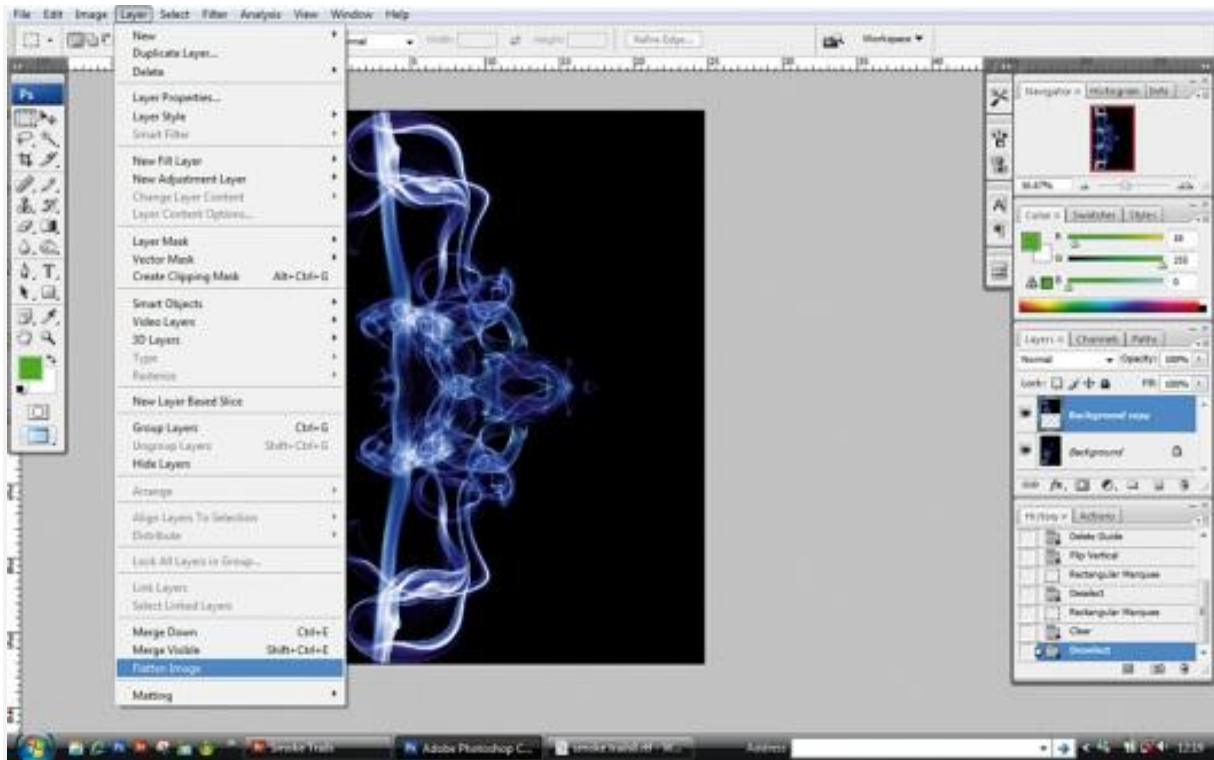

2. Layer cake

Create a duplicate Layer then flip it horizontally by selecting Edit>Transform>Flip Vertical. This will make a two-Layered image with the top Layer in the opposite rotation.

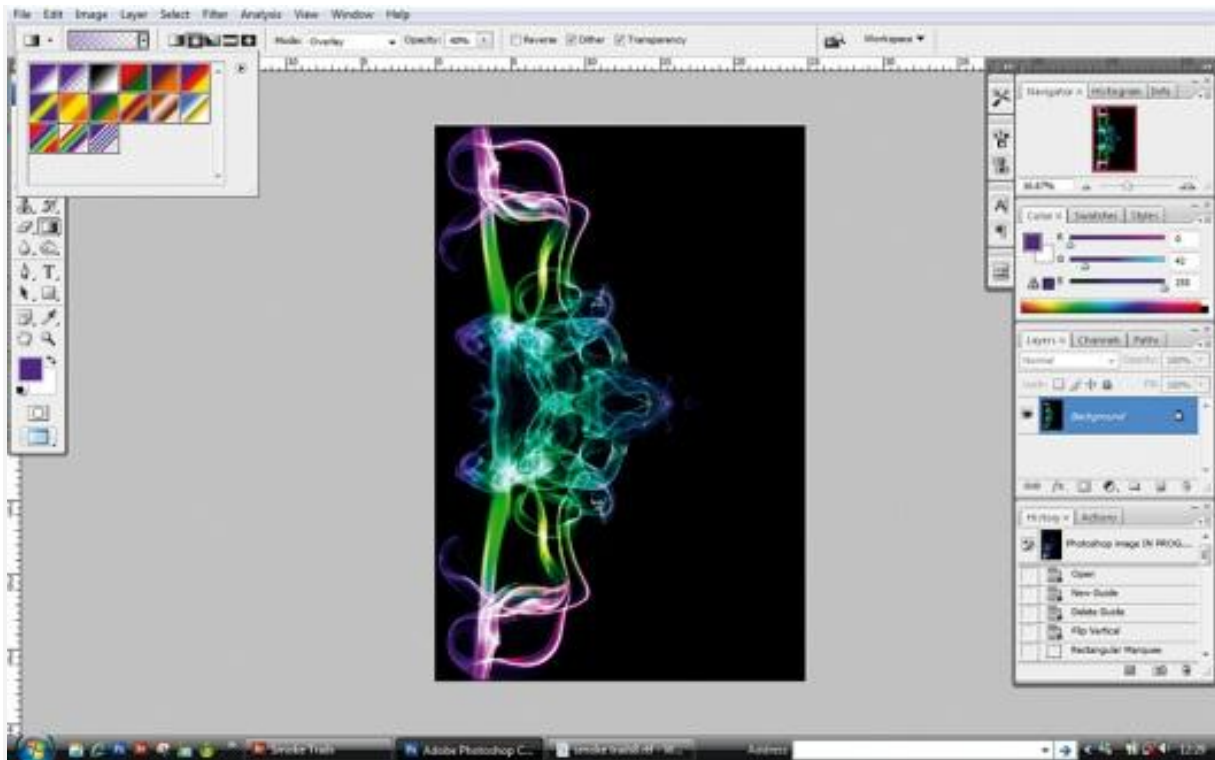

3. Top marquee

Select the Rectangular Marquee Tool and starting from the bottom corner, select the image up to the centre Guide. Hit the Delete key to reveal the background Layer.

4. Mirror mirror

Hide the Guides by pressing Ctrl+H so that you can see the whole image. To move on to the colouring work, flatten the Layers into one image by clicking Layer>Flatten Image.

5. Colour fill

Select the Gradient Tool from the Tools Palette, select a Radial Gradient pattern and choose a Foreground to Transparency fill. Use Overlay blending mode and set Opacity to 40%. Select various colours and drag the gradient tool over the image.
